Information Technology graduate with hands-on experience in website development, system implementation, and UI/UX optimization. Skilled in both frontend and backend development using modern web technologies. Experienced in delivering development projects, collaborating within teams, and building solutions that improve usability and system performance. Currently seeking opportunities to further advance web development expertise and contribute to a dynamic, growth-oriented environment.

Work Experience

Monochrome Pictures - Banjarmasin, Indonesia   Oct 2022 - Present
Photographer

Literaria Humilis - Tanah Laut, Indonesia   Jan 2025 - Mar 2025
Barista

Education Level

Tanah Laut State Polytechnic - Tanah Laut, Indonesia   Sep 2022 - Jul 2025
Diploma in Information Technology, 3.87/4.00
- Winner of the IT Logo Competition for the Information Technology Major 2023

Muhammadiyah Pelaihari Vocational High School - Tanah Laut, Indonesia   Jul 2019 - Jun 2022
Office Administration Major, 89.00/100.00

Organisational Experience

Cloud Borneo - Tanah Laut, Indonesia   Jan 2024 - Present
Website Developer
- Collaborated with the development team to build and maintain the Cloud Borneo company website, supporting hosting and digital service operations while ensuring consistent performance across user environments and devices.
- Designed and customized website layouts using WordPress, Divi Builder, and ACPT to create dynamic, business-aligned content structures that improved visual consistency, workflow efficiency, and overall brand identity across the platform.
- Implemented functional components, improved UI/UX, and optimized website performance to enhance user experience and accessibility by applying modern design principles, performance tuning techniques, and continuous interface refinement.
- Integrated backend configurations, plugins, and system components to ensure smooth functionality and scalable performance through structured workflows, clear documentation, and proactive issue identification.

Teaching Factory - Tanah Laut State Polytechnic   Feb 2024 - Jul 2024
Website Developer
- Designed and developed a responsive and user-friendly website to support Teaching Factory's academic and operational activities across all devices, ensuring consistent accessibility, clear information flow, and improved digital service interaction for users.
- Implemented frontend and backend features using HTML, CSS, JavaScript, and PHP frameworks, ensuring smooth integration and reliable performance while maintaining clean code structure, efficient workflow processes, and compatibility with evolving system requirements.
- Maintained website performance, functionality, and data security through optimization, routine maintenance, and adherence to coding best practices, including regular updates, vulnerability checks, and continuous improvements to enhance long-term platform stability.
- Performed testing, debugging, and documentation to ensure long-term reliability, scalability, and sustainability of the web platform.

DIGMA Student Press Organization - Tanah Laut State Polytechnic   Oct 2022 - Sep 2024
Coordinator of Photographer Division
- Served as Member and later Coordinator, overseeing creative direction, technical quality, and execution of all photography activities while ensuring consistent workflows across media production tasks to maintain high standards and smooth collaborative processes.
- Conducted journalistic coverage—including research, interviews, photo documentation, and storytelling—to produce accurate and engaging publications that supported communication goals and enhanced the organization's overall content development efforts.
- Operated DSLR cameras and editing tools to create high-quality visual content aligned with organizational branding standards while maintaining attention to detail and delivering visuals suited for diverse publication formats.
- Led the Basic Journalism Training (Feb 2023) as Chief Executive and collaborated with other division coordinators to meet visual content needs, organize event logistics, and ensure smooth execution of planned work programs.

Skills, Certifications, & Project Experience

- **Soft Skills**: Teamwork, Communication, Problem Solving, Time Management, Adaptability, Responsibility, High Initiative, Leadership, Project Management
- **Hard Skills**: Microsoft Office (Word, Excel, PowerPoint, Visio, Outlook), Web Development (HTML, CSS, JavaScript, TypeScript, PHP, Python, WordPress, Node.js), Frontend Frameworks (React, Ionic, Bootstrap, Tailwind CSS), Backend Frameworks (CodeIgniter, Laravel, ASP.NET), Database Management (MySQL), Version Control (Git), UI/UX Design (Figma, Canva), Video Editing (CapCut)
- **Junior Web Programmer Certification** (2025): Validated ability in responsive UI development, structured programming, multimedia-based coding commands, and effective use of pre-existing libraries while maintaining clean, well-organized code according to industry best practices.
- **Digital Marketing Certification** (2025): Demonstrated competencies in product and brand research, digital content preparation, data analysis, social media optimization, and execution of digital marketing strategies across online platforms.
- **Junior Web Developer Certification** (2024): Validated ability in responsive UI development, structured programming, multimedia-based coding commands, and effective use of pre-existing libraries while maintaining clean, well-organized code according to industry best practices.
- **IKN Sentiment Analysis Web System** (2025): Developed a sentiment analysis web system using the Naive Bayes Classifier, Laravel 12, and MySQL to visualize public opinion on Indonesia's new capital (IKN). Covered end-to-end processes including data preprocessing, model implementation, evaluation, and seamless integration into an interactive web dashboard.
- **Rautama Housing Catalog Website** (2025): Created a real estate catalog platform using Laravel, Bootstrap, and MySQL to display housing units, pricing, specifications, and detailed property information with an organized and responsive interface.
- **Middleman Transaction Platform** (2024): Developed a secure transaction platform using Laravel, Bootstrap, and MySQL to facilitate buyer–seller interactions, incorporating layered verification, transaction logging, and an intuitive workflow for both parties.
- **Cloud Borneo Website Development** (2024): Collaborated within a development team to build the Cloud Borneo company website using WordPress, Divi, and ACPT, delivering dynamic content structures that enhanced visual consistency, business alignment, and scalability for digital product presentation.
- **Library Information System – Tanah Laut State Polytechnic** (2024): Developed a web-based Library Information System using CodeIgniter 4, Bootstrap, and MySQL to manage book collections and user records. Improved data accessibility, administrative efficiency, and system usability through structured workflows, responsive interface design, and organized database management.
- **Personal Expense Tracking App** (2024): Built a mobile expense-tracking application using Ionic 5, TypeScript, Angular, and SQLite, enabling users to manage daily spending with an offline-first approach, local storage syncing, and a simplified user experience.
- **Online Student Admission Website – Tanah Laut 4 Junior High School** (2023): Served as Team Leader in developing an online student admission (PPDB) website using Bootstrap, CodeIgniter 4, and MySQL. Coordinated feature development, ensured data accuracy, and implemented a seamless registration flow for students and administrators.
- **Muhammadiyah Pelaihari Vocational High School Profile Website** (2023): Collaborated in developing the school profile website as a full-stack developer using PHP Native, Bootstrap, and MySQL. Implemented page structures, data modules, and responsive layouts to support the school's branding and information needs.
