Information Technology graduate with hands-on experience in website development, system implementation, and UI/UX optimization. Skilled in both frontend and backend development using modern web technologies. Experienced in delivering development projects, collaborating within teams, and building solutions that improve usability and system performance. Currently seeking opportunities to further advance web development expertise and contribute to a dynamic, growth-oriented environment.

Work Experience

PT Barito Berlian Motor - Banjarbaru, Indonesia Feb 2026 - Present
IT Programmer

- Developing and maintaining internal systems and applications to support dealership sales, service, and spare parts operations, including system maintenance, database management, and IT support for daily business activities.

Monochrome / Lamoria Pictures - Banjarmasin, Indonesia Oct 2022 - Present
Freelance Photographer

- Served as a photographer for Wond31rful Indogrosir Banjarmasin (2024), producing promotional and event photography content aligned with branding and marketing objectives.
- Completed 8+ photography and videography projects for weddings and graduation events, delivering high-quality visual content that met client expectations and project requirements.

Cloud Borneo - Tanah Laut, Indonesia Jan 2024 - Present
Freelance Website Developer

- Collaborated with the development team to build and maintain the Cloud Borneo company website, supporting hosting and digital service operations while ensuring consistent performance across user environments and devices.
- Designed and customized website layouts using WordPress, Divi Builder, and ACPT to create dynamic, business-aligned content structures that improved visual consistency, workflow efficiency, and overall brand identity across the platform.

Teaching Factory - Tanah Laut State Polytechnic, Indonesia Feb 2024 - Jul 2024
Website Developer

- Designed and developed a responsive and user-friendly website to support Teaching Factory's academic and operational activities across all devices, ensuring consistent accessibility, clear information flow, and improved digital service interaction for users.
- Implemented frontend and backend features using HTML, CSS, JavaScript, PHP frameworks, MySQL, and WordPress, ensuring smooth integration, reliable performance, and maintainable code structure compatible with evolving system requirements.

Education Level

Tanah Laut State Polytechnic - Tanah Laut, Indonesia Sep 2022 - Jul 2025
Associate Degree in Information Technology, 3.87/4.00

- Winner of the IT Logo Competition for the Information Technology Major 2023
- Participant in the Wirausaha Merdeka (WMK) program under MBKM 2024, gaining hands-on experience in entrepreneurship and business project management
- Internship at PT Tiga Pilar Rautama (2024) – Digital Marketing: created content and promotional materials for online campaigns, improving brand visibility, engaging audiences, and supporting marketing strategy implementation across multiple digital platforms.

Muhammadiyah Pelaihari Vocational High School - Tanah Laut, Indonesia Jul 2019 - Jun 2022
Office Administration Major, 89.00/100.00

- Internship at Kantor Kecamatan Pelaihari (2021) – Front Office Intern: assisted front desk services, handled administrative documents, and supported public service activities.

Organisational Experience

DIGMA Student Press Organization - Tanah Laut State Polytechnic Oct 2022 - Sep 2024
Coordinator of Photographer Division

- Served as Member and later Coordinator, overseeing creative direction, technical quality, and execution of all photography activities while ensuring consistent workflows across media production tasks to maintain high standards and smooth collaborative processes.
- Conducted journalistic coverage—including research, interviews, photo documentation, and storytelling—to produce accurate and engaging publications that supported communication goals and enhanced the organization's overall content development efforts.
- Led the Basic Journalism Training (Feb 2023) as Chief Executive and collaborated with other division coordinators to meet visual content needs, organize event logistics, and ensure smooth execution of planned work programs.

Certifications

- Junior Web Programmer Certification (2025)
- Digital Marketing Certification (2025)
- Junior Web Developer Certification (2024)

Project Experience

- **IKN Sentiment Analysis Web System (2025):** Developed a sentiment analysis web system using the Naive Bayes Classifier, Laravel 12, and MySQL to visualize public opinion on Indonesia's new capital (IKN). Covered end-to-end processes including data preprocessing, model implementation, evaluation, and seamless integration into an interactive web dashboard.
- **Rautama Housing Catalog Website (2025):** Created a real estate catalog platform using Laravel, Bootstrap, and MySQL to display housing units, pricing, specifications, and detailed property information with an organized and responsive interface.
- **Middleman Transaction Platform (2024):** Developed a secure transaction platform using Laravel, Bootstrap, and MySQL to facilitate buyer–seller interactions, incorporating layered verification, transaction logging, and an intuitive workflow for both parties.
- **Cloud Borneo Website Development (2024):** Collaborated within a development team to build the Cloud Borneo company website using WordPress, Divi, and ACPT, delivering dynamic content structures that enhanced visual consistency, business alignment, and scalability for digital product presentation.
- **Library Information System – Tanah Laut State Polytechnic (2024):** Developed a web-based Library Information System using CodeIgniter 4, Bootstrap, and MySQL to manage book collections and user records. Improved data accessibility, administrative efficiency, and system usability through structured workflows, responsive interface design, and organized database management.
- **Personal Expense Tracking App (2024):** Built a mobile expense-tracking application using Ionic 5, TypeScript, Angular, and SQLite, enabling users to manage daily spending with an offline-first approach, local storage syncing, and a simplified user experience.
- **Online Student Admission Website – Tanah Laut 4 Junior High School (2023):** Served as Team Leader in developing an online student admission (PPDB) website using Bootstrap, CodeIgniter 4, and MySQL. Coordinated feature development, ensured data accuracy, and implemented a seamless registration flow for students and administrators.
- **Muhammadiyah Pelaihari Vocational High School Profile Website (2023):** Collaborated in developing the school profile website as a full-stack developer using PHP Native, Bootstrap, and MySQL. Implemented page structures, data modules, and responsive layouts to support the school's branding and information needs.
